SUMMARY

IT undergraduate with hands-on experience in full-stack web development using React, Node.js, and MongoDB. Skilled in building scalable and responsive applications. Seeking a full-stack or backend development internship to apply and grow technical expertise.

EDUCATION

- **Ajay Kumar Garg Engineering College** *Ghaziabad, India*
  Bachelor of Technology in Information Technology *2022 – 2026 — CGPA: 7.3*

EXPERIENCE

- **Techkrate** *Remote*
  Full Stack Development Intern *June 2025 – Present*
  - Contributing to the development of scalable web applications using React.js, Node.js, Express, and MongoDB.
  - Implemented RESTful APIs, optimized database queries, and improved overall application performance.
  - Collaborating in an agile team to deliver production-ready features and bug fixes.
  - Designed responsive, accessible UI components to enhance user experience across devices.

TECHNICAL SKILLS

- **Languages:** C, C++, JavaScript, HTML5, CSS3
- **Web Technologies:** React.js, Node.js, Express.js, Tailwind CSS, GSAP, Framer Motion
- **Databases:** MongoDB, MySQL
- **Tools & Platforms:** Git, GitHub, VS Code, Postman, Vercel, Render

PROJECTS

- **DRIBBLE - Real Time Chat Application** *MERN Stack, Socket.io*
  - Developed a scalable full-stack chat application supporting secure group and one-on-one messaging for 100+ concurrent users.
  - Integrated Socket.io for low-latency, real-time communication ensuring seamless user experience.
  - Implemented JWT authentication and protected routes for data privacy and session security.
  - Designed a responsive UI for optimal user experience across desktop and mobile devices.

- **YouTube Clone** *React, Node.js, Express, MongoDB, Tailwind CSS*
  - Engineered a video-sharing platform with features like video uploads, streaming, likes, comments, and subscriptions.
  - Implemented JWT-based authentication and role-based access, securing 95%+ of routes.
  - Integrated Cloudinary for optimized media storage and delivery, reducing video load times by 30%.
  - Achieved 100% Lighthouse accessibility and performance scores using Tailwind CSS.

- **OVERSOCKS - E-commerce Website** *Full Stack: React, Node.js, Express, MongoDB, Tailwind CSS, Vercel*
  - Developed a scalable, full-stack e-commerce website for branded socks with product listings, filtering, and smooth animations; designed to handle 500+ daily visitors.
  - Integrated secure user authentication, product management, and cart functionality using React and Node.js, enabling 100% seamless checkout experience.
  - Leveraged Framer Motion and GSAP for engaging micro-interactions, improving user engagement by 40% during testing.
  - Deployed on Vercel with optimized backend APIs, achieving sub-1.5s page load times and high reliability across devices.
