PROFESSIONAL SUMMARY

Final-year Information Technology undergraduate and Full Stack Developer with hands-on experience building scalable web applications using React.js, Node.js, Express.js, MongoDB, and PostgreSQL.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), Typescript, C++, HTML, CSS
- **Frontend:** React.js, Tailwind CSS, GSAP, Material UI (MUI), Responsive Design
- **Backend:** Node.js, Express.js, Nest.Js, CMS(Sanity,Strapi), REST APIs, JWT Authentication, Socket.io
- **Databases:** MongoDB (Mongoose), MySQL, PostgreSQL
- **Tools & DevOps:** Git, GitHub, Postman, Vercel, Render, Cloudinary, IDE(VS Code, Antigravity)

EXPERIENCE

- **Hypeliv**
Software Engineer Intern May 2026 – Present
 - Engineered and delivered a production website for a US-based client using React.js with a headless CMS backend.
 - Built backend services for an AI-powered creator analytics platform using NestJS, BullMQ for async job queuing, and PostgreSQL via TypeORM; integrated AWS S3, Rekognition, and SES for media storage, content moderation, and transactional email.
 - Participated in code reviews, debugging sessions, and sprint planning to drive iterative feature delivery.
- **Techkrate**
Full Stack Developer Intern Jun 2025 – Sep 2025
 - Architected and delivered backend modules for a production e-commerce platform using Node.js, Express.js, and MongoDB.
 - Built secure REST APIs for product management, cart, and order processing with JWT authentication and role-based access control.
 - Contributed to React.js frontend — implemented responsive product listings and checkout flows integrated with backend business logic.

PROJECTS

- **UBER Clone (Live)** React.js, Node.js, Express.js, MongoDB, Socket.io, Google Maps API, JWT
 - Developed a full-stack real-time ride-booking platform with two user roles (rider/driver) and live trip tracking via WebSockets.
 - Integrated Google Maps API for location autocomplete, distance/time estimation, dynamic fare calculation, and live marker updates.
 - Implemented 100% route protection with JWT authentication and role-based middleware across all API endpoints.
- **AutoCrawler – Web Crawling Platform (Live)** React.js, Node.js, MongoDB, Puppeteer, Socket.io, JWT, n8n
 - Built a scalable web crawling platform using Puppeteer and Axios supporting recursive crawl sessions across 100+ pages with dynamic and static content handling.
 - Delivered real-time crawl progress via Socket.io with a history dashboard tracking 1,000+ crawl records and automated email reporting per request.
 - Secured the platform with JWT authentication, Passport middleware, and role-based API access control.
- **Real-Time Chat Application (Live)** Node.js, Express.js, MongoDB, Socket.io, JWT, Cloudinary
 - Built a low-latency messaging system using Socket.io supporting 100+ concurrent users with one-on-one and group chat, and real-time presence tracking.
 - Optimized MongoDB schemas with targeted indexing to improve query efficiency and ensure reliable message delivery at scale.
 - Integrated Cloudinary for secure media sharing with multipart upload handling and session-scoped access control.

EDUCATION

- **Ajay Kumar Garg Engineering College** Ghaziabad, India
Bachelor of Technology in Information Technology | CGPA: 7.5+ 2022 – 2026
